The following office action is responsive to the Amendment and Executed Declaration submitted October 25, 2005. Claim 7 has been canceled and the limitations therein incorporated into independent claim 1. Claims 1-6 and 8-11 are pending in this application.

***Allowable Subject Matter***

1. The following is an examiner's statement of reasons for allowance:

While the prior art of record would make obvious the photothermographic imaging material comprising a support having thereon on at least one side thereof at least one photosensitive silver halide emulsion layer and at least one infrared sensitizing compound inclusive of the instant formula (1), as originally claimed by applicants, applicants' have amended the base independent claim to more particularly point out the instant invention by requiring that said photothermographic imaging material further contain a bisphenol compound of the instant formula (7). While a bisphenol compound and its use thereof is well known in the photothermographic art, the prior art of record does not expressly teach or suggest the claimed combination of an infrared sensitizing compound of the instant formula (1) and a bisphenol compound of the instant formula (7). Applicants have clearly demonstrated in the executed declaration filed herein that significant photographic advantages with respect to  $D_{min}$ , sensitivity,  $D_{max}$ , process environment sensitivity, light resistance and shelf life stability are realized with the inventive photothermographic imaging material characterized by containing the combination of compound the instant formula (1) and (7).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

2. Claim 1-6 and 8-11 are allowed.
